

2025 WVHA Certificate of Need (CON) - *specific Call to Action*

TRT: 30 Seconds

Rural hospitals are under attack. Special interest groups are pushing to eliminate vital health care protections by dismantling the Certificate of Need program - safeguards that ensure your community has stable and reliable access to medical care.

Their dangerous proposal would leave your local hospital vulnerable to out-of-state corporations. Without these protections, your access to emergency and specialty care is at risk and some small hospitals will be forced to close their doors entirely.

Don't let them gamble with your family's healthcare. Call your legislator today and tell them to vote NO on repealing the Certificate of Need law. Keep quality, affordable health care in our communities, where it belongs.
