Trainings

PER-370 Detecting Contamination Hospital First Receivers

August 11

Morgantown

This one-day training course is designed for Emergency Medical Services and Medical Health Care providers who have awareness level training on radiological/nuclear emergency response. This course will provide further understanding into the EMS response component to radiological/nuclear accidents and Radiological/Nuclear Weapons of Mass Destruction (WMD) incidents. [Flyer](#)

PER 348 Operations Level Response to Radiological/Nuclear WMD

August 12

Morgantown

The course is an introduction to operations in a radiological/nuclear environment during incidents involving radiological Weapons of Mass Destruction (WMD). [Flyer](#)

PER 332 – Population Monitoring at Community Reception Centers

August 13, 2026

Morgantown, WV

This one-day course prepares emergency responders and non-uniformed support personnel to operate monitoring stations within the Community Reception Center (CRC), or similar reception center in order to perform population monitoring and contamination reduction measures after a radiological or nuclear incident. [Flyer](#)

AWR 232: Mass Fatalities Planning & Response for Rural Communities

September 9

Moundsville, WV

AWR 232 is an 8-hour, DHS/FEMA-certified, tuition-free, awareness-level course. The goal of this course is to teach participants the basics of mass fatality response while providing opportunities to exchange rural

perceptions and brainstorm solutions to simulated emergencies. [Flyer](#)

HAPevolve-Emergency Management Conference

September 16, 2026

Grantville, PA

This conference will provide the setting for professionals in emergency preparedness, physical security, and cybersecurity to discuss the opportunities and challenges for the future, network, and collaborate on ways to move health care preparedness forward. [Learn More](#)

PER-320 Personal Protective Measures for Biological Events

September 29

Morgantown - [Flyer](#)

October 1

South Charleston - [Flyer](#)

Personal Protective Measures for Biological Events is a one-day course focusing on the challenges faced by first responders and clinical health care professionals in prehospital and hospital environments.

West Virginia Pediatric Symposium

Registration is officially open for the annual pediatric symposium. [Link to Register](#)

WVU Medicine Emergency Management Symposium

October 8-9

Morgantown

This annual symposium is a networking and learning opportunity that is open to professionals in emergency management, healthcare, first responders and public health. [Register](#)

Resources

ASTHO: Tracking Cyclosporiasis: Understanding the current outbreak, case investigations and prevention efforts

ASTHO's latest [communications on cyclosporiasis](#) highlight the current outbreak and the public health response as case counts continue to climb. The article explains how health departments are tracing the source of infection, why cyclospora is especially difficult to investigate, and what clinicians and consumers should know about delayed symptoms, specialized testing, and the recalled Taylor Farms iceberg lettuce linked to the outbreak. [Read More](#)

FEMA Emergency Management Institute – NIMS Online Trainings

IS-100: Introduction to the Incident Command System – [Take the Course](#)

ICS 100, Introduction to the Incident Command System, introduces the Incident Command System (ICS) and provides the foundation for higher level ICS training. This course describes the history, features and principles, and organizational structure of the Incident Command System. It also explains the relationship between ICS and the National Incident Management System (NIMS).

- **ICS-200: Basic Incident Command System for Initial Response – [Take the Course](#)**

IS200, Basic Incident Command System for Initial Response, reviews the Incident Command System (ICS), provides the context for ICS within initial response, and supports higher level ICS training. This course provides training on, and resources for, personnel who are likely to assume a supervisory position within ICS.

ICS-300

ASTHO developed this [Infectious Disease Preparedness Program Planning Workbook](#) to provide a structured framework to strengthen infectious disease readiness. The workbook guides partners at all levels through identifying gaps, mapping interest holders, prioritizing solutions, and developing plans that are both actionable and measurable. The result is coordinated action, continuous improvement, and effective response to outbreaks and emerging health threats.

Coalition Regional Meetings

Region 3\4
